

TEXTBOOK REFERENCES

WOCNCB embraces the latest evidence based practices in our specialty areas, incorporating such evidence into our testing. Exams are updated on a regular schedule. Exam development is a lengthy process, which ensures a quality product and adherence to best practices in testing. Please be aware it is possible to see prior content while tests are updated. (In other words, references are used when exam questions are written but due to the lengthy process to incorporate them into an exam means it may take time to show on a scored exam.)

A list is provided below of suggested references on wound, ostomy, and continence care. This list does not attempt to include all acceptable references, nor is it suggested that the WOCNCB® examinations are necessarily based on these references. Please refer to the Exam Content Outline for the list of topics covered on exams. USAGE OF THESE REFERENCES ARE INTENDED AS A RESOURCE AND WILL NOT GUARANTEE YOUR PASSING THE EXAM.
