

**Wound, Ostomy and Continence Nursing Certification Board (WOCNCB)
Wound Treatment Associate – Certified (WTA–C)
Detailed Content Outline**

	<i>Exam Percentage</i>	<i>Number of Questions (110)</i>
Domain 1: Data Collection and Documentation	30.76%	34
Task 1: Identify wound and skin injury risk factors using medical records and patient/family interview to guide the development of the plan of care.	7.33%	8
Task 2: Collect objective skin-related and wound-related data to guide the development of the plan of care.	7.82%	9
Task 3: Document skin-related and wound-related data and interventions to contribute to the development or modification of the plan of care.	7.41%	8
Task 4: Perform ongoing evaluation of patient, skin, and wound using direct observation and other assessment tools in order to ensure an appropriate and effective plan of care.	8.20%	9
Domain 2: Skin and Wound Care	54.88%	60
Task 1: Implement preventive measures based on patient-specific information to promote optimal skin health.	8.10%	9
Task 2: Provide wound care for partial-thickness and full-thickness wounds (e.g., surgical wounds, traumatic skin tears, thermal wounds) by following evidence-based practice guidelines to improve patient outcomes.	8.33%	9
Task 3: Provide wound care for pressure-related injuries by following evidence-based practice guidelines to improve patient outcomes.	8.28%	9
Task 4: Provide wound care for lower extremity wounds (e.g., lower extremity arterial disease (LEAD), lower extremity venous disease (LEVD), lower extremity neuropathic disease (LEND)) by following evidence-based practice guidelines to improve patient outcomes.	7.77%	8
Task 5: Provide care for moisture-associated skin damage (MASD) (e.g., incontinence-associated dermatitis (IAD), intertriginous dermatitis (ITD)) by following evidence-based practice guidelines to improve patient outcomes.	7.93%	9
Task 6: Provide wound care for medical adhesive-related skin injury (MARS) by following evidence-based practice guidelines to improve patient outcomes.	7.24%	8
Task 7: Provide appropriate nonpharmaceutical and pharmaceutical pain management interventions to optimize patient comfort.	7.22%	8
Domain 3: WTA-C Professional Practice	14.37%	16
Task 1: Educate patients, caregivers, and other health care professionals on wound care principles in order to promote consistent delivery of care.	7.15%	8
Task 2: Collaborate with certified wound care nurse (CWCN)/licensed independent practitioner (LIP) when patient care needs exceed WTA-C scope of practice or established protocols.	7.22%	8
